

FRAMEWORK OF IMAGE EDITOR LIKE PICSART

Our Timeline

what are
features of
framework?

feature
prioritization

Three Qs of
architecture

Class diagram

what are features of this framework?

This framework should define photo and attributes and does it displays, save, download an image.

This framework should have Tools to edit photo such as cropping, cutting, select a part of it, resize, adjust, rotate and flip.

User should pay money to save edited photos.

other features

Person can
register on it and
edit the photos.

This defines
albums and
maintain photos
on them.

This framework
should add
another
photo, text,
frame, border or
stickers to
photos.

This framework
should have
Effect to
manipulate
photo such as
blur, distort,
colorize, pop art
and gray scale
and so on.

feature prioritization

This framework should define photo and attributes and does it displays, save, download an image.

This framework should have Effect to manipulate photo such as blur,distort,colorize,pop art and gray scale and so on.

This framework should have Tools to edit photo such as cropping, cutting,select a part of it, resize,adjust, rotate and flip.

This defines albums and maintain photos on them.

Three Qs of architecture

This framework should define photo and attributes and does it displays, save, download an image.

Q1: Is it part of the essence of the system?

Yes, because this framework work with photos and without it ,there really don't work.

Q3: How can I implement it?

.I don't really work with images.

Three Qs of architecture

This framework
should have
Tools to edit
photo such as
cropping,
cutting,select a
part of it,
resize,adjust,
rotate and flip.

Q1: Is it part of the essence of the system?

Yes,because this framework manipulates photos.

Q3: How can I implement it?

.Implementation of tools is ambiguous for me.

Three Qs of architecture

This framework
should have
Effect to
manipulate
photo such as
blur,distort,
colorize,pop art
and gray scale
and so on.

Q1: Is it part of the essence of the system?

As above

Q3: How can I implement it?

As above

Three Qs of architecture

This framework
defines albums
and maintain
photos on them.

Q3: How can I implement it?

I doubt how to save photos to the album
